

DENT de MAN

THE SPIRIT OF A MAN

Founded in 2011, DENT de MAN is a British fashion brand which has disrupted the fashion landscape by introducing modern-classic tailored menswear combined with vintage Indonesian prints. Effortless playful style for the free-thinking gentleman underlines the brand's philosophy. DENT de MAN aims to empower individuals to dress for themselves. The prints connect with the subconscious mind telling historic tales of far away places and oriental spirituality.

The prints used are of vintage origin ranging from 1800 to the 1930's and have a meaning that reflects its connection to key life changing experiences of the curator. Batik fabrics are adorned with Javanese patterns created by using a specialist wax block printing technique. This is what ultimately defines the brand's DNA: An endless admiration for ancient printing methods entwined with a deep-seated need for self-reflection; the spirit of the past meeting the pace of the future.

By transferring the curator's experiences on print, one can express its feelings into wordless expression, crafting a visual and spiritual guide to the soul and enabling the DENT de MAN man to tell his own story.

DENT de MAN has an international presence in over 10 countries across Asia, Europe and North America, in some of the most high profile boutiques and stores.
